## Full Stack Developer

Denver | Colorado

### PROJECTS

#### **BurgerBuilder** - [nathanejbrown.github.io/Burger-Builder](https://nathanejbrown.github.io/Burger-Builder)

Burger Builder is an ongoing project that I'm working on in React, which I've been teaching myself recently. It allows a user to build and order (which simply sends a post request) a custom burger. As I continue to work on it, I'll be incorporating Redux, tests, form validation, and several other technologies/features.

#### **BeerLeagueMe** - [nathanejbrown.github.io/beerleagueme](https://nathanejbrown.github.io/beerleagueme)

This is an ongoing project to create a network of local sports events. The front end is built in AngularJS, and accesses a separately deployed Node.js server with a PostgreSQL database.

#### **Tribbianify** - [nathanejbrown.github.io/q1Project](https://nathanejbrown.github.io/q1Project)

This was a project I did for fun that's based on an episode of Friends where Joey uses a thesaurus on every word in a letter he's writing to make it sound more intelligent. It heavily utilizes AJAX technology and was built with HTML, CSS, JavaScript, and jQuery.

### EXPERIENCE

#### **Lifesparq, Boulder** — *Software Developer*

July 2017 - November 2017

- Primary developer for phase one of company's software.
- Delegated to the rest of the development team and coordinated that team.
- Built version one of the company's software using multiple external APIs including the USDA database.
- Needed scheduling flexibility to take care of personal family matters, which is why I left this role.

#### **Apple, Broomfield** — *Family Room Specialist*

November 2013 - May 2016

- Genius bar technician, certified in Mac OS X and iOS service.
- Awarded for high-level efficiency and customer service.
- Serviced thirty to forty customers on a daily basis.

### EDUCATION

#### **Galvanize, Denver** — *Web Development Immersive*

- Covered front-end design and back-end architecture using JavaScript, HTML5/CSS3, jQuery, and Node.js.
- Worked in teams using an agile development strategy.

### SKILLS

#### **Technologies & Tools**

JavaScript

jQuery

HTML5

CSS3

AJAX

RESTful APIs

Node.js

Express

ReactJS

Redux

AngularJS

PostgreSQL

Bootstrap

Version Control (git)

Heroku Deployment

Yeoman

Python

Blockchain

#### **Techniques**

Agile Workflow

API Libraries Integration

Pair Programming

Responsive Design

Version Control

#### **Other**

Communication

Teamwork

Creativity

Self Motivated
