Full Stack Developer

Denver | Colorado

PROJECTS

BurgerBuilder - nathanejbrown.github.io/burger-builder

Burger Builder is an ongoing project that I'm working on in React, which I've been teaching myself recently. It allows a user to build and order (which simply sends a post request) a custom burger. As I continue to work on it, I'll be incorporating Redux, tests, form validation, and several other technologies/features.

BeerLeagueMe - nathanejbrown.github.io/beerleagueme

This is an ongoing project to create a network of local sports events. The front end is built in AngularJS, and accesses a separately deployed Node.js server with a PostgreSQL database.

Tribbianify - nathanejbrown.github.io/q1Project

This was a project I did for fun that's based on an episode of Friends where Joey uses a thesaurus on every word in a letter he's writing to make it sound more intelligent. It heavily utilizes AJAX technology and was built with HTML, CSS, JavaScript, and jQuery.

EXPERIENCE

Self-Employed, Broomfield — *Writer*

- Wrote a book that I'm working on publishing.
- Wrote multiple short stories.
- Published online articles.

Lifesparq, Boulder — *Software Developer*

- Primary developer for phase one of company's software.
- Delegated to the rest of the development team and coordinated that team.
- Built version one of the company's software using multiple external APIs including the USDA database.

Apple, Broomfield — *Family Room Specialist*

- Genius bar technician, certified in Mac OS X and iOS service.
- Awarded for high-level efficiency and customer service.
- Serviced thirty to forty customers on a daily basis.

EDUCATION

Galvanize, Denver — *Web Development Immersive*

- Covered front-end design and back-end architecture using JavaScript, HTML5/CSS3, jQuery, and Node.js.
- Worked in teams using an agile development strategy.
